Index of Species

Page numbers in italics refer to the subjects of the paper.

Adalia bipunctata, 401–412
Agrobacterium tumefaciens, 430
Agrostis tenuis, 122
Alces alces, 200
Allium, 100, 101, 102
Allium cepa, 53
Aminopeptidase, 47–51
Amsinckia spectablis, 171
Anthoxanthum odoratum, 122
Ascobolus immersus, 283
Aspergillus nidulans, 282–283, 335, 338, 391

barley, *249–254*, 313
Bidens menziesii, 235–244
Brania clavata, 154, 155

Caledia captiva, 248, *293–306*
Calliptamus barbarus, 245–248
Canis latrans, 205
Canis lupus, 205
Capitella capitata, 151–156
Capreolus capreolus, 204
Capsicum, 319
Cepaea hortensis, 261–267
Cepaea nemoralis, 261–267
Cervus elaphus, 200
Chamaenerion angustifolium, 39
Chorthippus parallelus, 245–248
Cochliobolus heterostrophus, 335–339
Corynebacterium fasciens, 430
Crepis capillaris, 59
Cryptobothris chrysophorous, 159
Cryptobothris terminifera, 160
Cryptomonas, 28
Cynosurus cristatus, 121–126

Dama dama, 199–207
Daphnia carinata, 27, 34
Daphnia cucullata, 27–36
Daphnia galeata mendotae, 27–36
Daphnia hyalina, 35
Daphnia magna, 27, 34,
Daphnia pulex, 34, 35
Datura innoxia 127–133
Dichroplus, 160
Dinophilus gyrociliatus, 154–155
Drosophila, 17, 19, 44, 105, 145, 149, 163, 210, 219, 220, 348, 402
Drosophila melanogaster, 9–18, 19–27, 69–82, 83–91, 163–165, 209–221, 355–367, 369–374
Drosophila pseudoobscura, 44, 219
Drosophila simulans, 83
Drosophila subobscura, 10, 219, 220
Drosophila virilis, 219, 220

Enoplognatha ovata, 37–45
Escherichia coli, 282

fallow deer, *199–207*
Festuca, 101

Gobius paganellus, 255–260
Gonioporalobata, 269–271

hamster, *280*
Heracleum sphondylium, 39
Holcus lanatus, 122
Homo sapiens, 348
Hordeum vulgare, 102, 308, 313, 315, 318, 319, 326
human, *277, 278, 279, 280, 283, 284, 286, 286–287*
Hypochoeris radicata, 421

Idotea baltica, 418
Ipomoea hederacea, 384
Ipomoea purpurea, 384

Lathymus pratensis, 39
leucine aminopeptidase, 47–51
Lolium multiflorum, 124, 125
Lolium perenne, 122
Lycopersicon/Solanum, 319
Lymantria dispar, 149

maize, *307–313*, 390
Martes foina, 205
Mentha rotundafolia, 39
Mirounga angustirostris, 205
Mirounga leonina, 205
Mormoniella vitripennis, 402
mosquito, *282*
mouse, *279, 280, 285, 286, 287*
Muntiacus reevesi, 200
Mus domesticus, 286–287
Mus musculus, 286–287
Mus musculus molossinus, 160
Mus ssp, 285
Myrmeleotettix maculatus, 61–68, 380
Myrmeleotettix myrmeleotettix, 66
Mytilus edulis, 47–51, 369

Narcissus, 171
Neurospora, 219
Neurospora crassa, 335, 338
Nicotiana alata, 325
Nicotiana forgetiana, 325
Nicotiana rustica 315–320, 321–326
Nicotiana tabacum, 127–133, 135, *327–333*

Odobenus rosmanus rosmanus, 205
Odocoileus virginianus, 200
Oedipoda charpentieri, 245–248
Ophryotrocha puerilis, 154, 155

Petunia, 390, 425
Petunia parodii, 53–59
Petunia parviflora, 53–59
Phaulacridium, 161
Phosphohexos isomerase, 47–51
Phosphoglucomutase, 47–51
Picea glauca, 379
Pisum sativum, 318, 319
Piasmodium falciparum, 282

Plasmodium knowlesi, 282
Pleuronectes platessa, *105–110*
Podisma pedestris, *157–161*
Porcellidium fimbriatum, 418
Primula, 172
Primula sinensis, 171
Pseudomonas solanacearum, 431
Pseudomonas syringae pv. *savastanoi*, 430
Pteridium aquilinum, 39
Puccinellia maritima, 414
Pycnogaster cucullata, *375–380*

Rangifer tarandus tarandus, 199
Ranunculus repens, 39
Rhizobium, 430
Rosa canina, 39
Rubus fruticosus, 39
Rubus idaeus, 39
rye, *181–186*, *421–426*

Salmo, 255
Schizophyllum commune, 335, 338, 339
Secale africanum, 102
Secale cereale, *229–234*, *421–426*
Secale cereale ssp. *segetale*, 182, 183
Secale vavilovii, *229–234*, *421–426*
shrew, common, *175–180*
Sitophilus granarius, 149
Sitophilus oryzae, *145–150*
Solanum acaule, *135–138*
Solanum stoloniferum, 136
Solanum tuberosum, *135–138*
Sorex araneus, *175–180*
Sorghum bicolor, *307–313*
Sorghum bicolor ssp. *bicolor*, *307–313*
Sorghum halepense, 310
Sorghum versicolor, *307–313*
Spathosternum prasiniferum, 160
Sphaeroma rugicauda, *413–420*
Stachys sylvatica, 39

Taraxacum spp., 39, 93, *289–291*
Taraxacum (sect. *Erythrosperma*), *223–228*
Taraxacum (sect. *Hamata*), 289
Taraxacum brachyglossum *289–291*
Taraxacum lacistophyllum, *289–291*
Taraxacum levigatum, 223
Taraxacum obliquum, *223–228*
Taraxacum officinale 223
Taraxacum rubicundum, *223–228*
Taraxacum tortilobum, *223–228*
Thalarctos maritumus, 205
Thiara balonnensis, 227
Tisbe reticulata, 418
Tragopogon spp. 290
Trifolium pratense, 122
Trifolium repens, 122, 387–391
Trillium grandiflorum, 379
Triticum aestivum, *93–103*, 318, 319
tsetse fly, *281*
Turnera ulmifolia, *167–174*

Urtica dioica, 39
Ustilago violacea, 220

Vulpes vulpes, 205

Wheat, hexaploid bread, *93–103*
white clover, *387–391*

Xeropicta vestalis, 44

Zea diploperennis, *307–313*
Zea luxurians, *307–313*
Zea mays ssp. *mays*, *307–313*
Zea mays ssp. *mexicana*, 307–313
Zea mays ssp. *parviglumis*, *307–313*

Subject Index

Entries followed by the letters (Abs) refer to abstracts of papers given at a meeting of the Genetical Society.

additive genetic variance, effect of linkage on, 139–143
African trypanosome, variable antigens in (Abs), 281
alcohol dehydrogenase null activity alleles in *Drosophila*, 369–374
agamospermous microspecies, genetic variation in, 223–228
analysis of fitness for *Est*-6 in *Drosophila*, 83–91
antigen gene expression in trypanosomes (Abs), 281

barley breeding, use of doubled haploids in, 249–254
B chromosome effects in *Secale*, 229–234
B chromosome of the grasshopper, 61–68
B chromosomes affecting chiasma frequency in rye, 421–426
B chromosomes of *Pycnogaster cucullata*, 375–380
biochemical polymorphism, lack of, in fallow deer, 199–207
body colour in *Cepaea*, 261–267
book reviews, 144, 272–275, 427–431

cell hybrids, isolation and analysis of (Abs), 284
cell interactions and the MHC (Abs), 286
chiasma frequency in rye, 421–426
chiasma redistribution in bivalents, 245–248
chromosomal structure of a hybrid zone, 293–306
chromosome banding in a grasshopper, 157–161
chromosome cytology of hybrid petunia, 53–59
chromosome mediated gene transfer (Abs) 279, 279–280, 284
chromosomes of coral, 269–271
climatic selection on body colour in *Cepaea*, 261–267
correlation between mating events in plants, 381–385
cystic fibrosis gene (Abs), 279

developmental homeostasis and heterozygosity, 341–353
digametic sex determination, 151–156
dihaploidy, potential of, for breeding improved varieties, 127–133
distyly in perennial weeds, 167–174
doubled haploids, use of, in barley breeding, 249–254

electrophoretic variation in the common mussel, 47–51
environmental variance, effect of, on parent-offspring conflict, 1–8
enzyme polymorphism in *Drosophila*, 69–82
enzyme variability in *Daphnia*, 27–36
epimutations in somatic cell genetics (Abs) 280
Esterase-6 in *Drosophila*, 83–91
ethanol, tolerance to, in *Drosophila*, 355–367
evolutionary modification of recombination rates, 209–221
evolution of female mating preference, 401–412
evolution of t and H-2 complexes in the mouse (Abs), 285–286

fertility in XO mice (Abs), 286

gametic disequilibrium in plaice, 105–110
gene conversion, polygenic control of, (Abs), 283
gene-environment interaction, effect of, on longevity, 19–26
gene transfer in *N. rustica*, 315, 320, 321–326
genes for potato virus resistance, 135–138
genetical correlations, causes of, between pairs of characters, 327–333
genetic and environmental variability in an estuarine isopod, 413–420
genetic diversity level in populations, 348
genetic education (Abs), 277
genetic models of female choice, 187–198
genetic variation and selection for fertility, 335–339
genetic variation in agamospermous microspecies, 223–228
genetic variation in recombination in *Drosophila*, 209–221
genetics of homostyly, 167–174
genotypic control by B chromosomes of chiasma frequency in rye, 421–426
genotypic frequencies, changes in, in a grasshopper, 293–306
genotypic structure in a permanent grass, 121–126

heteromorphic bivalent association at meiosis, 83–103
heterozygote superiority, limits of, 346
heterozygosity in natural populations, 341–353
HLA alleles and survival during epidemics (Abs), 286
homostyly in perennial weeds, 167–174
human DNA repair genes (Abs) 277–278
human gene mapping (Abs), 277, 279

inbred lines, comparison of, in hybrid tobacco, 127–133
inheritance of sex ratio in rice weevil, 145–150
irradiated pollen in gene transfer in *N. rustica*, 315–320, 321–326
isoenzyme variation in shrews, 175–180
isozyme variation in *Taraxacum* agamospecies, 289–291

life-span, selection for, 9–18
linamarase, control of synthesis of, 387–391
linkage and additive genetic variance, 139–143
linkage and pleiotropy, detection of in *N. tabacum*, 327–333
longevity, effects of gene-environment interactions on, 19–26

malarial parasites (Abs), 282
materno-foetal aspects of MHC (Abs), 286
mating events in plants, correlation between, 381–385
mating system in a perennial grass, 121–126
mating system, variation in, of *Bidens menziesii*, 235–244
meiosis in breadwheat, 93–103
meiotic transmission rates, 61–68
MHC antigens, (Abs) 286
molecular analysis of mouse MHC genes (Abs), 285
molecular genetics of blood stage antigens (Abs), 282
molecular genetics of HLA (Abs), 286
mouse major histocompatibility complex (Abs) 287
multiple chromosome polymorphism, Robertsonian fusion in, 255–260

nuclear division in hybrids, control of (Abs), 284–285
nuclear DNA content in *Zea* and *Sorghum*, 307–313
null activity alleles in natural populations of *Drosophila* 369–374

pairing preferences in teletrisomic rye, 181–186
parent-offspring conflict, 1–8
phenotypes regulating pigmentation in a spider, 37–45
plant somatic hybridisation (Abs) 278–279
plasmodia sporozoites and malaria infections, (Abs), 282

P-M hybrid dysgenesis in *Drosophila*, 163–165
polymorphism for rare alleles in *Drosophila*, 83–91
polymorphism in B chromosomes, 229–234
polymorphism in rates of meiotic drive, 61–68
polymorphism, lack of, in fallow deer, 199–207
prediction of random inbreds and second cycle hybrids, 111–119
preferential mating in ladybirds, 401–412

Qa and TL antigens (Abs), 285
quantitative genetic models of female choice, 187–198

random inbreds, predicting properties of, 111–119
recombination frequencies in *Drosophila*, 209–221
regulatory element controlling linamarase, 387–391
regulatory phenotypes in a spider, 37–45
resistance to potato virus, genes for, 135–138
reviews of books, 144, 272–275, 427–431
Robertsonian fusion in multiple chromosome polymorphism, 255–260

second cycle hybrids, predicting properties of, 111–119
selection, climatic, on body colour in *Cepaea*, 261–267
selection for fertility in a fungus, 335–339
selection for life-span, 9–18
selection on *Drosophila* enzymes, 69–82
selection strategy in plant breeding, 393–399
sequence divergence and allelism in class I HLA genes (Abs), 286–287
sex determination in a marine polychaete, 151–156
sex ratio, inheritance of, in rice weevils, 145–150
sexual selection by female choice, 187–198
sexual selection in ladybirds, 401–412
somatic cell genetic techniques (Abs) 283–284
somatic cell hybrids in gene mapping (Abs) 283
somatic cell hybrids, karyotype of (Abs), 278
somatic cell hybrids, translocations occurring in (Abs) 280
somatic hybrid petunia, chromosome cytology of, 53–59
stabilizing role of B chromosomes in *Pycnogaster*, 375–380
supernumerary chromosome segments in grasshoppers, 245–248
survival in relation to *Adh* activity in *Drosophila*, 355–367

telotrisomic rye, preferential pairing in, 181–186
transformation system for *Aspergillus* (Abs), 282–283
Trypanosomes, African (Abs), 281
tumerigenicity in human cell hybrids (Abs), 278
two-stage selection strategy in plant breeding, 393–399

variability, enzyme, 27–36
variability, in the estuarine isopod, 413–420
variant form of white clover, 387–391
variation between siblings of agamospermous parents, 289–291
variation, electrophoretic in mussel, 47–51
variation in DNA content in 2 genera, 307–313
variation in mating system, 235–244
variation, isoenzyme in shrews, 175–180
